

# SUCCEED<sup>®</sup>

Digestive Conditioning Program<sup>®</sup>  
Nutritional supplement for horses

Oral  
Paste

## Easy, step-by-step instructions for oral application

Use daily for ongoing nutritional support of a healthy and effective equine digestive tract. Ideal for performance horses, even while on an active training program.

### Guaranteed Analysis:

Crude Protein (Min)	8.32%
Threonine (Min)	1.75%
Glutamine* (Min)	1.40%
Crude Fat (Min)	44.72%
Crude Fiber (Max)	3.28%

\*Not recognized as an essential nutrient for horses.

### Ingredients:

Oat Oil, Oat Flour, Sunflower Oil, Irradiated Dried Yeast, L-Threonine, L-Glutamine, Guar Gum

### Directions for Use:

**Empty entire contents of one syringe into horse's mouth. Feed twice each day for first week of use, once each day thereafter.**

For best results, use with regular feed or immediately before feeding. May be used as top dress on feed.

### Important

- SUCCEED is a natural product that gently maintains digestive health through good nutrition. As a result, please allow up to 90 days for full benefits.
- This product is intended to supplement the diet of horses and is not to be used in place of regular feed.
- If you pump product from syringe, do not allow to sit exposed to air for more than 30 minutes. This may reduce its appeal to the horse.

**Store at temperatures below 100° F (38° C).  
Keep out of direct sunlight.**

For best results, use with feed or immediately **before** feeding. Feed twice each day for the first week of use, once each day thereafter.

The benefits of good nutrition may be visible within 30 days. However, allow 90 days for full benefits. As with any nutrition program, if you stop using SUCCEED, the changes will subside.

- 1.** Remove protective cap from end of syringe.

- 2.** From either side of your horse, grasp the halter with one hand to stabilize the horse's head.

- 3.** With the other hand, insert the end of the syringe in your horse's mouth where a bit would fit (just behind the teeth). Do not allow syringe to touch the palate.
- 4.** Push the plunger slowly and evenly in two or three small steps, each time allowing your horse to swallow the oral paste, until the syringe is empty.

To nutritionally support the horse's digestive tract in the face of stalling, training, competition and regimented feeding, use SUCCEED once a day, every day.
